

Company Profile

Our History, Our Partners

An open book is shown from a low angle, with its pages curled and blowing away as if caught in a breeze. The pages are a warm, golden-brown color, contrasting with the dark, almost black background. The lighting is dramatic, highlighting the texture of the paper and the movement of the pages. The overall mood is one of history and progress.

Group Mission and Vision

Mission

- With **Ympact**, we seamlessly connect fashion and luxury brands to their supply chains using cutting-edge **technology** and a solid **framework** backed by deep vertical expertise
- We **trace** key data and **measure** impacts for companies, helping them optimize operational processes, comply with regulatory developments, and contribute to industry-wide sustainability. Our focus is on reducing **environmental footprints** and enhancing **social responsibility**.

Vision

- With **Ympact**, we envision a **collaborative fashion and luxury industry** where all stakeholders work together, leveraging a common framework and interconnected technologies to drive essential transformation.
- Our goal is to provide practical solutions that **harmonise data, link sector participants, and enable large-scale, measurable change** with tangible impacts.

Company Profile

Value Proposition

Ympact aggregates skills and technologies to transform the fashion and luxury sector towards more transparent models with reduced environmental and social impact. This transformation is driven by cutting-edge traceability and impact measurement **technologies**, supported by a robust, recognized **framework** that aligns with market challenges and regulatory updates.

Our Values

- **Innovation**
A technology that is ever-evolving and responsive to the market needs.
- **Method**
A sound methodological approach that delivers concrete, measurable, and globally recognized results.
- **Expertise**
Over 15 years of vertical experience in the fashion and luxury industry.

IMPROVE

ESG **Assessment** for evaluating supply chain risks and performance
Consulting on 4sustainability pillars
Assistance for performance improvement
Supply chain **management system**

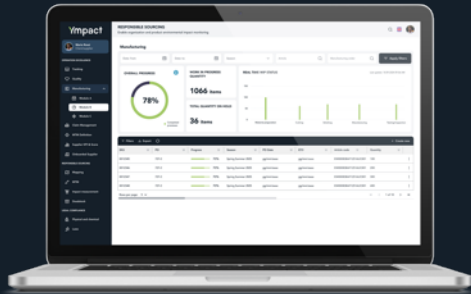

DISCLOSE

Aggregate reporting of supply chain ESG performance
Voluntary **sustainability report** or in accordance with CSRD
DPP for brands
4trace: Digital Supply Chain Passport
4s Assurance: attestation of the 4sustainability pillars' level of implementation

Our Platform: Ympact

Ympact

Ympact is the collaborative platform that enables fashion companies to **trace products, processes, and stakeholders** across the entire value chain, ensuring transparent and reliable impact monitoring and verification.

By integrating with client companies' systems, **Ympact collects and organizes value chain data and information** into four key areas, mirroring those of our journey.

With **over 500 million** digital raw material identities created, **more than 1 billion** materials tracked, and **over 80,000** companies mapped, Ympact lays the foundation for a structured approach to Supply Chain Due Diligence and Digital Product Passports.

Ympact is also the only technology solution enabled for the large-scale implementation of the **4sustainability framework**.

Our Framework: 4sustainability

4sustainability® is the impact assessment and sustainability performance improvement **framework** for fashion supply chains. By harmonizing the requirements of the most recognized industry methodologies and initiatives, 4sustainability simplifies performance measurement for companies and enables the annual verification and validation of progress—serving as both a guarantee and a communication tool for the market.

More than 1,500 companies have committed to an improvement journey with the 4sustainability Assessment, while **over 300** have achieved 4sustainability Assurance, verifying their project implementation through on-site audits.

4S CHEM

elimination of toxic and hazardous chemicals from production cycles

4S MATERIALS

transition to lower-impact materials for sustainable production

4S PLANET

responsible resource use to reduce environmental impact

4S CHAIN

process traceability and supply chain monitoring

4S PEOPLE

enhancement of organizational well-being

4S CYCLE

development of reuse, recycling, and sustainable design practices
